

# **A child in this house has complex health needs and is extremely vulnerable**

Children and young people with complex care needs, a weakened immune system and/or a respiratory illness will be vulnerable and more prone to catching coronavirus (COVID19), meaning they will be far more likely to suffer life-threatening complications if they become ill with it.

**Because of this, this household is self-isolating for 12 weeks to prevent infection and protect our loved ones at all costs.**

**Please leave deliveries at the doorstep, as we are unable to open the door. Thank you for your co-operation and understanding.**
